The New Roland EGX-360 Gift Engraver
MSRP: $17,995.00

Overview

Redefining Gift Engraving
Roland is pleased to announce the **new Roland EGX-360 Gift Engraver**. The EGX-360 is the ultimate gift engraver for stunning corporate gift, award, signage, rhinestone template creation and much more. The EGX-360 is easy to use and is one of the safest gift engravers on the market due to its integrated safety cover. The EGX-360 offers features only found in higher priced gift engraving systems.

The EGX-360 is geared towards the gift and awards customer as well as jewelers and even wineries and wedding houses to produce customized products for their clients. The compatibility with Roland R-WearStudio, EngraveLab and FlexiEngrave allows you to use the EGX-360 to produce everything from custom rhinestone templates for gift items and apparel to ADA and indoor signage. The EGX-360 may be the last engraver a customer will ever need.

Built on a foundation of Roland Innovation and Performance
The new EGX-360 includes features that raise the customer's engraving capabilities to a whole new level.

- USB and Serial Connectivity

- Bundled EngraveStudio Software

- Includes Pin Fixture, Pen/Medallion Jig and Plate fixtures

- Pendant Controller for Easy Control of Engraver

- Two-Year Warranty

Laser Pointer

When engraving high end gift items like glass, crystal, gold and silver the last thing you want to do is make a mistake. The EGX-360's integrated laser pointer allows the customer to set the engraving area easily by referencing 2 diagonal points. The machine will then set the origin to the center and can also feed that information back to the software or Windows print driver. The EGX-360 also has a preview function so that the customer can preview the job with the laser pointer to ensure that the machine engraves in the proper area.
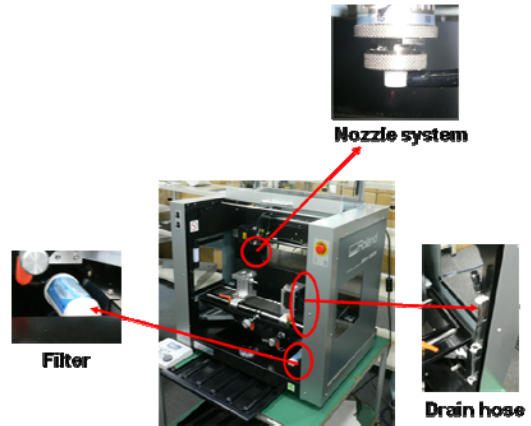

Integrated Safety Cover

The EGX-360 is currently the only gift engraver on the market that includes a safety enclosure. The safety cover cuts down on the noise level, debris and water splash. It also uses a damper type structure for smooth open / close operation which makes the EGX-360 ideal for retail environments as well as those looking for safety when purchasing a device.

Environmentally Friendly Recirculating Water System

The EGX-360 includes an environmentally friendly recirculating water system for use when engraving glass, crystal and marble. The water is needed to keep glass debris and tool friction to a minimum. The system uses plain tap water which is environmentally friendly and the filter is used to captures the glass particle which keeps the system running at an optimum level. The system also has an easy to use drain hose when switching out the water.

Filter

Drain hose

Optional Ring Attachment

The optional ring attachment allows the user to engrave the inside and outside of rings. The ring attachment can accommodate inside ring engraving diameters from 0.51 in. to 0.94 in. (13 mm to 24 mm) and outside ring engraving diameters from 0.63 in. to 3.31 in. (16 mm to 84mm).

USB Connectivity

USB connectivity allows for quick and easy connection to the PC. The EGX-360 supports Windows 2000/XP and VISTA (32 bit edition).

Flat Engraving Table

The EGX-360 includes a flat engraving table that allows the user to engrave large flat objects up to 12 in x 9 in. The flat table is ideal for engraving applications like namebadges, safety signs, ADA signage and R-Wear rhinestone motif templates.

Summary

Over the years, Roland has developed a unique family of products that redefined the engraving market from the MPX photo impact printers to our professional series high speed benchtop EGX-400/600 engravers. Many engravers have built entire businesses around their Roland engraving system. As Roland technology evolved, we've empowered thousands of professionals with new engraving capabilities to offer their clients products and services they never imagined. The Roland EGX-360 may be the last engraver a professional will ever need.
