

Add Dimension to Your Instruction

Students love to see their ideas come to life before their eyes. Easy, fast and safe to use, Roland MDX milling machines are perfect for the classroom and offer low-cost of ownership. The MDX-40A comes complete with CAM, 2D and 3D engraving and simulation software with free updates and no license limitations. Best of all, you can mill anything from foam to plastics or wood, so you can buy materials at your local Home Depot or hobby store.
