

Introducing the New **METAZA MPX-95**

Profitable Personalization and Direct Part Marking

On November 2, 2016, Roland is launching its new photo impact printer. The MPX-95 is available with an optional Gift Kit for giftware personalization or a DPM Kit for direct part marking and UDI equipment compliance. Roland's new and improved impact printer model is affordable and easy-to-operate, and offers a removable base to expand product personalization and instrument marking opportunities.

Key Features Overview

- Removable base plate and base unit to allow imprinting onto larger items
- Optional Gift Kit for giftware personalization or DPM Kit for direct part marking
- Diamond-tipped stylus marks hard and soft metals up to 200HV
- Includes easy-to-use METAZA Studio software—DPM version features 2D symbol code creator
- Built-in laser pointer for quick and accurate imprint set-up
- Compact and fully enclosed—runs quietly and safely in any kiosk, store or lab
