# SRP Player Software Now Available for the monoFab™ SRM-20 Desktop Mill

Advanced, yet user-friendly, SRP Player software is now available for the Roland monoFab SRM-20 desktop milling machine. This free, feature-rich software allows you to get the most out of your SRM-20, making it easier than ever to turn ideas into reality.

It's easy to get started with SRP Player! Just plug your SRM-20 into a workstation, drag and drop your selected CAD component into the Player, answer a series of five questions through the Interactive Wizard, and click "Start." That's all it takes to begin turning your conceptual designs into precision 3D parts and prototypes.

SRP Player Features and Benefits:

- A simplified user experience and improved work flow compared to older CAM applications.

- A powerful tool path engine that improves path quality and tool approach, allowing for higher quality finishes and faster path calculation times.
- Multiple tool path operations and progressive path simulations available through a built-in preview function.
- Advanced editing functions that let users explore new milling capabilities as their skills progress.
- Support for popular CAD file formats like STL, DXF, Rhino 3D Model and IGES.
