

VersaCAMM Front Cover (VFC) Product Information Guide

Roland is pleased announce its new VersaCAMM Front Cover accessory for the VP-300 and VP-540. The VFC is a clear acrylic cover that is available in 30" and 54" widths. This accessory can be easily mounted without any printer modification. All the necessary installation hardware is supplied with the VFC.

The main purpose of the VFC is to protect the printing mechanism from debris and foreign objects. This accessory also acts as a safety barrier between the operator and the machine while it is printing. The VFC will ensure safe unattended printing and will add to the safety of the printer.

Frequently Asked Questions VersaCAMM Front Cover (VFC)

Q. What is the list price for the VFC?

A. The list price for the 30" cover is \$219.99 and \$299.99 for the 54" cover.
