

PRINT & CUT WITH ONE OR TWO DEVICES

ROLAND GIVES YOU THE CHOICE

Whether you're looking for economical and versatile print/cut capabilities, or a high powered production setup, Roland has the right solution for you.

ONE DEVICE

Roland VersaCAMS and SOLJET integrated printer/cutters are renowned for their versatility and ease of use.

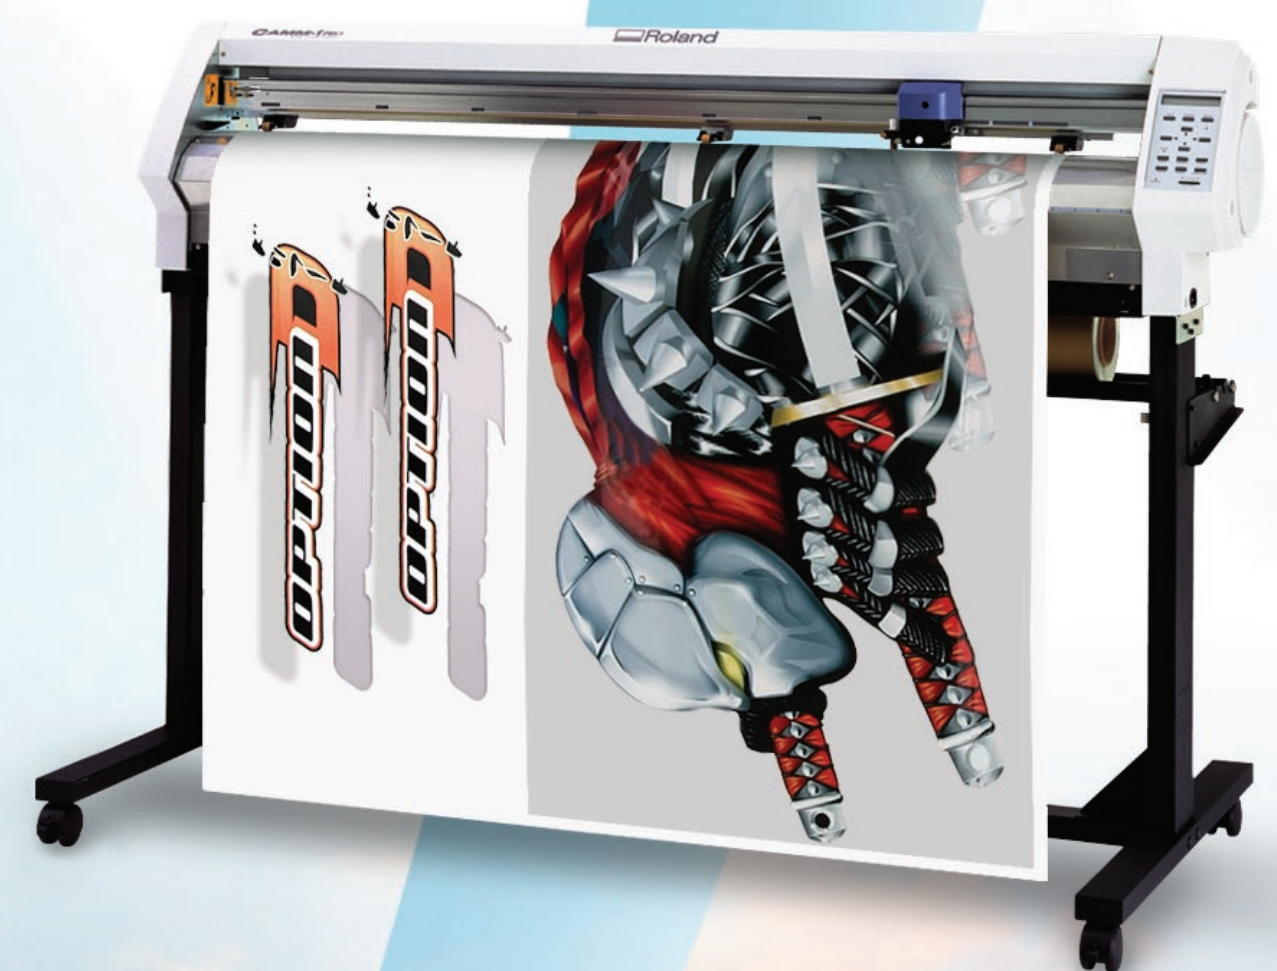

Once they finish printing, graphics are automatically contour cut in one seamless workflow.

TWO DEVICES

A GX-Pro Series cutter is the perfect complement to a VersaArt printer.

Print at high volumes without stopping the printer to contour cut labels, vehicle graphics, decals, signage, POPs, trade show graphics and more.

Increase throughput and shorten delivery time for all your contour cutting needs while using Versaworks for an integrated workflow.
