Roland

Accessing The Roland CutChoice

Roland CutChoice may only be accessed via a design application. Complete the following steps to access Roland CutChoice after you have opened your design application:

Adobe Illustrator 8 and 9

From the **File** menu select **Cut/Plot**.

Note: On Macintosh, the Roland CutChoice window will display on top of Cut/Plot dialog. Click on the Cut/Plot dialog to bring it to the front to change the job settings.

CorelDRAW 8 and 9

From the **File** menu select **Cutplot.csc**.

Note: The menu command will only be available after following the section on "Configuring the CorelDRAW 8 and 9 Menu".

CorelDraw 10

Click on the Cut/Plot tool button.
Note: The tool button will only be available after following the section on "Configuring the CorelDRAW 10 Toolbar".

Alternatively, you can follow the procedures below.
1. From the **Tools** menu select **Run Script**.
2. Open the Misc. Folder.
3. Select **CutPlot**.
4. Click **Open**.
