

3DTechnics

Flamingo

- Flamingo brings the raytrace and radiosity rendering to Rhino, giving photometrically accurate images with reflections, refraction, diffusion, translucency, transparency, color bleeding, shadows, depth of field, depth attenuation, ClearFinish, and indirect lighting.
- Viewpoint animation for walk-throughs and fly-bys, and sunlight animation for shadow studies.
- Procedural clouds, fractal-generated 3-D plants, procedural 2-D and 3-D materials, progressive-refinement for quick preview, and extensive material, plant, and background libraries.
- Hardware requirements: Pentium or above; Windows 2K/XP/Vista; 200Mb; 512+Mb
