Rhino Terrain Install Process

a) **Make sure at least Rhino Service Pack 6 is installed**
    http://www.3dtechnics.com/support_rhino.phmtl
    → Updates

b) **Install the Visual C++ Runtime Package: vcredist_x86.exe**
    http://www.3dtechnics.com/support_rhino_terrain.phtml
    → Utilities

c) **Turn User Access Control limits OFF**
    Depending on the Windows version, the control switch for this is in
    → Control Panel → User Accounts

d) **Install the Rhino Terrain binary**
    http://www.3dtechnics.com/support_rhino_terrain.phtml
    → Binaries

e) **Enter the Rhino Terrain license key when prompted**
    Usually this is at the bottom of your 3DTechnics invoice, or it may be sent to
    you by separate e-mail.

At this time, User Access Control has to be turned off when Rhino is activated.   It can be turned off after the initialization, since the Rhino Terrain license has been read at this point.
