

# QUICK TIP

## What is this thin roll of paper for?

If you've had the opportunity to set up Roland's new EJ-640 printer than you've probably asked yourself the question above. It certainly can't be for print calibrations, so what in the world is this roll of paper for?

The sheet of paper is used to measure the media feed accuracy from left to right. This analog procedure is easy to perform and can be done quickly during your set up. See

[“ej-640\\_media\\_feed\\_adjustment.pdf”](#).

WHAT THE HECK  
IS THIS FOR?
