The possibilities are endless with the new
LEF-12 benchtop UV flatbed printer.

One of the most advanced and affordable benchtop UV flatbed printers in its class, the LEF-12 delivers Roland's unparalleled UV printing capabilities to print directly on a vast array of substrates and three-dimensional objects. Combine CMYK, White and Clear Coat ink for visual impact and unique dimensional effects on giftware, awards, packaging, prototypes, and promotional products like thumb drives, pens, cell phone covers, laptops and more. With the VersaUV LEF-12, you're only limited by your imagination.

Print Directly on Three-Dimensional Objects

The VersaUV LEF-12 accommodates objects up to 3.94-inches thick, with a maximum print area of 11-inches by 12-inches. Print directly onto a wide range of giftware and promotional items ranging from pens, key chains and golf balls to trophies, cell phone covers and even laptop computers. Powered by Roland Intelligent Pass Control™ technology, the VersaUV delivers vibrant, detailed image quality in all print modes.

Advanced ECO-UV Inks for Maximum Performance

The LEF-12 comes configured with CMYK plus White plus Clear Coat ECO-UV inks specially formulated to deliver high color density and wide gamut, for exceptional images print after print. Clear Coat can produce a matte or high-gloss finish for improved scratch and chemical resistance and outdoor durability, or can be built up for 3D textures and embossed effects. ECO-UV ink lasts up to two years outdoors when flooded with clear coat and up to six months unprotected.

Feel the Color with UV Clear Coat Effects and the Roland Texture Library

One of the most powerful features of the VersaUV is the ability to use Clear Coat ink to create a wide range of special effects, from matte or gloss finishes to simulated embossing. By laying down multiple layers of Clear Coat, you can create truly unique textured effects from water droplets to faux leather to dozens of Roland Texture Library patterns. As your customers literally feel the color, you'll find yourself answering their question "How did you do that?"

Unsurpassed Media Compatibility Comes Standard

Advanced ECO-UV inks combined with low heat state-of-the-art UV LED lamps enable the LEF-12 to print on virtually any substrate with optimum print quality. ECO-UV ink adheres to a wide range of treated and untreated substrates, including PVC, PET, ABS, acrylic, wood, boards and much more.

Laser Alignment System for Optimum Registration

The VersaUV LEF-12 incorporates a built-in laser alignment system for quick and easy setup of different materials. Aligning registration by bounding box or center point provides the flexibility to print on objects of all shapes and sizes. Whether it's a flat photo frame, curved golf ball or round coaster, you can automatically capture and process the setup information to ensure proper image placement.

Mist Filters Ensure Quality and Reliability

To ensure outstanding print quality around the curvatures of objects, two mist filters are incorporated in the LEF-12, one on the back of the unit and the other located between the print head and the UV lamp. These mist filters catch most residual ink that may mist when printing off the edge or curvature of a product. This cuts down on overspray and keeps the ink from settling on the printers internal components. Both filters are easily replaceable by the end user.

Designed for the Environment and Safety

The VersaUV LEF-12 requires only a fraction of the power used by conventional UV printers and features an LED lamp that is completely ozone-free and emits only UV-A light, making the LEF-12 a safe and energy-efficient alternative to conventional UV printers. In addition, the LEF-12 is fully enclosed, reducing the risk of UV light exposure to the eyes and skin while limiting dust and debris, and minimizing ink odor. To ensure proper ventilation and reduce odor, Roland carries an optional air filtration system, custom built for the VersaUV LEF-12. This unit also doubles as a cart and storage unit for jigs, fixtures and supplies.

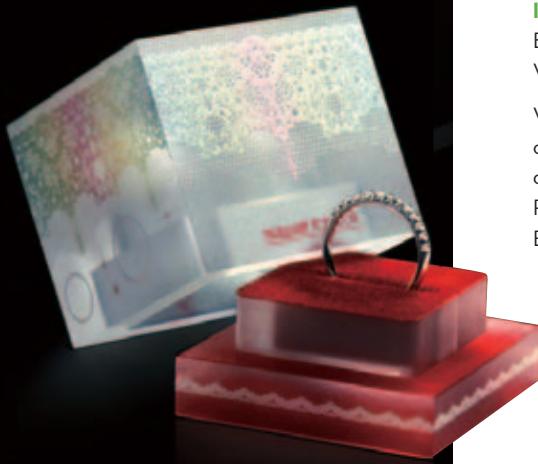

Includes Roland VersaWorks® RIP software with Enhanced Productivity Tools

Based on the latest Adobe® CPSI engine 3019 for faster processing, better color and smoother gradations, VersaWorks RIP is a true Adobe PostScript 3® RIP and can control up to four Roland devices at once.

VersaWorks features the Roland Color System for spot color matching, Variable Data Printing for customized job output, ink consumption and print time estimation, and the Max Impact preset for richer color contrast, outstanding image quality and maximum productivity. VersaWorks also includes the Roland Texture Library featuring 72 ready-to-use textures that can be applied to designs by layering ECO-UV Clear Coat ink.

Includes Roland OnSupport

Roland OnSupport is an online support portal that provides real time feedback on your machine. This system monitors ink levels and provides access to manuals and software updates, how-to guides, preventive maintenance guides, machine usage metrics and periodic updates to firmware. It sends notifications to your cell phone or email address and allows you to both manage productivity and gain direct feedback from Roland.

PRODUCT SPECIFICATIONS

Model	LEF-12	
Printing method		Piezoelectric inkjet / Table feed system
Acceptable media	Width	13.2 in. (335mm)
	Depth	12.2 in. (310mm)
	Thickness	3.94 in. (100mm)
	Weight	11 lbs (5kg)
Printing area		12x11 in. (305x280mm)
Ink cartridges	Type	Roland Eco-UV inks
	Capacity	6 cartridges - 220 ml (\pm 5 ml)
	Color	6 colors (Cyan, Magenta, Yellow, Black, White and Clear Coat)
	Configuration	CMYK+White+Clear Coat
Ink curing unit		Single UV LED Lamp
Printing resolutions		Maximum 1440x720 dpi
Distance accuracy		Error of less than \pm 0.3 % of distance traveled, or \pm 0.012 in (0.3 mm), whichever is greater
Interface		Ethernet (10 BASE-T / 100 BASE-TX, automatic switching)
Power-saving function		Automatic sleep feature
Power supply	Voltage and frequency	AC 100 to 240 V \pm 10%, 50/60 Hz
	Required power capacity	Maximum 1.8 A
Power consumption	During operation	156W
	Sleep mode	16.7W
Outer Dimensions		39.3 x 34.2 x 21.5 in. (998 (W) x 867 (D) x 546 (H) mm)
Weight		187.4lbs. (85Kg)
Environment	Power on	Temperature: 68° to 90°F (20° to 32°C) (72°F [22°C] or more recommended) / Humidity: 35 to 80% (no condensation)
	Power off	Temperature: 41° to 104°F (5° to 40°C) / Humidity: 20 to 80% (no condensation)
Included items		Power cord, adhesive sheet, software RIP (Roland VersaWorks™), user documentation

Specifications subject to change. * Continuous exclusive use of Roland inks during the first two years of ownership is required to qualify for the free second year of limited warranty coverage. Additional Terms and Conditions apply.
** Room ventilation and an air filtration unit are required.
