The VersaUV LEF-12 Benchtop UV Flatbed Printer

**Need a job done yesterday?** The VersaUV LEF-12 benchtop UV flatbed printer turns your ideas into reality in minutes. Perfect for short-runs, personalization and prototypes, Roland's unparalleled UV technology lets you print directly on a vast array of substrates, including three-dimensional items up to 3.94" thick. Print White, CMYK and Clear inks for vibrant colors and stunning special effects. Eliminate traditional set-up costs and maximize parts per day, producing quantities like 300 team golf balls in an hour, or 200 custom pens, or 48 personalized iPhone covers. With the LEF-12, you'll turn time into money.

For a free sample, call (800) 542-2307, or visit [www.rolanddga.com/lef](http://www.rolanddga.com/lef).

Imagine.  Roland®
