

With the HeatWave Sublimation System you can print transfers for everything from t-shirts and mugs to sporting goods and banners up to 103" wide.

NAIL IT EVERY TIME WITH HEATWAVE™ SUBLIMATION.

MOVE SUBLIMATION BEYOND THE DESKTOP WITH ROLAND HEATWAVE.

There's a new wave in sublimation and it's a hot one. It's called HeatWave and it has everything you need to produce bold, crisp sublimation graphics for jerseys, promotional items, awards, signage, tile murals, snow boards, banners and much more. With HeatWave, you get flawless sublimation transfers time after time. That's because every HeatWave system component has been customized and tested by Roland to perform in concert for the dependable, consistent results you require.

HeatWave sublimation extends well beyond the desktop. Start with a choice of two VersaCAMM™ printer/cutters – a 30-inch or a 54-inch model – or a 104-inch-wide SOLJET™ SJ-1000EXS printer. The system offers sublimation ink, sublimation transfer paper and powerful color management RIP software. For added versatility, HeatWave's VersaCAMM models also perform as stand-alone vinyl cutters. Best of all, every HeatWave system is backed by the high standards for reliability and performance you have come to expect from Roland.

Roland HeatWave. The New Wave in Sublimation. 

THE ROLAND HEATWAVE SUBLIMATION SYSTEM

HeatWave Sublimation Inks. The HeatWave system begins with custom-formulated, clog-free sublimation inks developed especially for Roland inkjets to produce an exceptionally vibrant color gamut. These advanced inks produce bold, crisp graphics that permanently bond to a wide variety of fabrics, plastics, and ceramic tile substrates. HeatWave Sublimation Inks offer a level of color vibrancy and permanence unrivalled by direct printing or traditional heat transfers.

HeatWave Sublimation Inks (Cyan, Magenta, Yellow or Black) 220 ml cartridges \$149.99/cartridge

Three Wide-Format Models Offered. When it comes to HeatWave sublimation, you can think big. That's because HeatWave comes in three high-performance wide-format models: two VersaCAMM printer/cutters - a 30-inch and a 54-inch model - and a 104-inch-wide SOLJET SJ-1000EXS printer. All come equipped with custom color management RIP software, produce stunning CMYK prints at up to 1440 dpi, and perform with Roland sublimation inks and transfer paper. For added value, Roland VersaCAMM models also function as stand-alone vinyl cutters.

| | | |
|--------------------|--------------------------------|-------------|
| VersaCAMM SP-300VS | 30" Sublimation Printer/Cutter | \$14,995 US |
| VersaCAMM SP-540VS | 54" Sublimation Printer/Cutter | \$19,995 US |
| SOLJET SJ-1000EXS | 104" Sublimation Printer | \$69,995 US |

HeatWave Sublimation Paper. Specially designed to take advantage of the characteristics of our sublimation inks, HeatWave Sublimation Paper produces the best prints for high-quality transfers to a wide variety of substrates. Its superior ink load capabilities yield bright and colorful graphics with maximum ink transfer. The heavyweight 120-gram paper is coated on both sides for extra stability and anti-cockle properties, and is extremely easy to handle during the transfer process.

|----------------------------|-----------------|----------|
| HeatWave Sublimation Paper | 30" x 150' roll | \$89.95 |
| | 54" x 150' roll | \$162.95 |

Roland Custom Software RIP. HeatWave systems come complete with powerful color management RIP software. The VersaCAMM SP-300VS and SP-540VS includes Roland's own VersaWorks™. The SOLJET SJ-1000EXS includes COLORIP®. Both packages have been customized for HeatWave ink with universal sublimation profiles for several types of materials. These profiles take the guesswork out of sublimation, making it easy to control color saturation for consistent transfers every time. HeatWave software packages also feature simultaneous RIP & Print capability, enhanced color management and direct printing from TIFF, JPEG, EPS, PS, PDF and DCS 2.0 files.
