

The new **TrueVIS** VG series printer/cutters
COMPLETELY REIMAGINED

The new TrueVIS VG series represents a major leap forward in inkjet print/cut technology. New FlexFire print heads produce dots with high frequency and precision. New inks are more cost-effective. New cutting increases accuracy and downforce. New tech communicates with phones and tablets. And so much more.

New Features:

- **New TrueVIS INK** in cost-effective, 500ml pouches with reusable cartridges
- **Four new FlexFire™ print heads** deliver high-firing frequency, precision droplet placement in 3 sizes, and a wide print swath
- **New Bluetooth-enabled Roland DG MobilePanel** for smartphone or tablet control panel operation
- **New cutting carriage, blade holder, and blade** for increased down force and media compatibility
- **Print speeds:** 153 sqft/hr. (dual CMYK, 6-pass); 375 sqft/hr. (maximum)
- **Included take-up unit** boosts performance during long production runs
