

Roland Face Designer enables you to create a relief from a photographic image (1024x768 Pixels) containing a side-profile of a person's head and neck. Supported images include: Bitmap, TIFF, GIF or JPEG. The images produced with Roland Face Designer will work with the Roland RX-50 Medal Editor Software as well as Roland 3D Engrave for the Roland EGX-20, EGX-300, EGX-400/600, JWX-10, MDX-15/20, MDX-500 and MDX-650. When using the Roland Face Designer image with Roland Medal Editor or Roland 3D Engrave, creating a realistic looking 3D relief is easy. The software includes detailed tutorials as well as sample projects to assist you in creating your first projects.
