

Techgems Description

- Techgems is a module that works under Rhino to allow for quick definition of gem stones and materials.
- Techgems has two gem entry systems:
 a) Techgems Native: In this interface you can create your own stones and work with them in a Rhino design

b) Signity Gemstones Library: In this interface you can select from the Signity Gemstones Library:

- Techgems 4.2 includes a basic version of the Signity Gemstone Library. The complete version can be downloaded from www.signity.biz for an upgrade price.
- Techgems 4.1 and 4.0 can be upgraded to Techgems 4.2 for free. See the download sections on our techgems faq: http://www.3dtechnics.com/faq_techgems.phtml
